

FACT SHEET

Tracer Sayonara™

Sayonara is the triathlon industry's first swimskin to use the patented Yamamoto Biorubber Mark III fabric, a lightweight super composite skin (SCS) made of Titanium alloy for thermoregulation and a hydrogen-bonded surface to reduce drag and maximize water repellency.

Material

Yamamoto Biorubber Mark III is made of an elastic knit construction to provide flexibility and balance to evenly support the swimmer's body in all directions.

Fabric Technology

Three-Layer SCS Fabrication Structure (only 0.3 mm thick):

- Outer Surface: Limestone based Micro-Honeycomb structure forms a ball-bearing effect of water molecules for maximum water repellency at a low drag co-efficient of .021, a decrease of 34% over the existing Yamamoto fabric on the market.
- Mid-Layer: Flexible Titanium alloy contours to the natural shape of the swimmer to reduce stress and muscle fatigue.
- Inner Layer: Soft, lightweight single knit stretch has a water absorption ratio of only 0.5%.

Key Features

- Core Control Panel stabilizes the swimmer against rotational forces to maintain a proper body position for maximum stroke efficiency.
- Zoned ventilation panels are strategically placed on the legs and rear with enhanced cooling properties.
- Durable, coiled zipper with Velcro closure holds fast to provide a secure fit.
- Soft, reinforced neckline reduces chaffing and prevents excess water build-up.
- Extended pull cord assists with smooth transitions.
- Tapered, flexible leg grippers prevent chaffing and allows for quick removal.
- Four-way flat lock seaming offers athlete the greatest range of motion.

Body Styles

Sayonara Male Zipperback Short John, Sayonara Male Zipperback Full Body, Female Sayonara Zipperback Short John, Sayonara Female Zipperback Full Body.

Competition

Sayonara is designed as a high performance swimskin technology for non-wetsuit triathlons when the water temperature is greater than 78 degrees, but less than 84 degrees Fahrenheit.

Sayonara: Team TYR

Some of the world's top triathletes have served our development team as an invaluable resource for ongoing testing and feedback.

Chrissie Wellington	UK	2-Time Kona Ironman World Champion
Andy Potts	USA	Olympian, Ironman 70.3 World Champion, and 3-Time USAT Elite Triathlete of the Year
Becky Lavelle	USA	2008 Life Time Fitness Triathlon Series Champion
Pip Taylor	AUS	2009 Australian and Oceania Long Course Champion
Desiree Ficker	USA	2008 Ironman 70.3 South Africa Champion
TJ Tollakson	USA	2008 Ironman Arizona Runner-Up

Tracer™ Technology

Integrating the high performance benefits of the elite Tracer technology, Sayonara is developed precisely to fit the needs of triathletes. In Tracer technology, athletes have set world, American and national records in the pool. Amaury Leveaux recorded the fastest times in history in Tracer in the 50-meter freestyle SC and 100-meter freestyle SC.

About Yamamoto

Founded in 1964, Yamamoto Corporation provides the highest quality super composition skin performance fabrications to the sports of swimming, triathlon and sport diving. The Japanese-based company holds more than 90% of the wetsuit market share. Biorubber Mark III with Titanium alloy is the latest patented Yamamoto fabrication technology.

About TYR

TYR is passionately dedicated to providing all athletes with the products and inspiration to perform at the highest level possible. The name TYR (pronounced tier) is taken from the mythical Norse god of warriors and deity among athletes, representing heroism and victory in battle. The TYR brand embodies the competitive spirit of sport, and is a symbol of courage and triumph.
